

Step 1:  
Remove both nuts, washers and the seal

Step 2:  
Unwind the 17mm nut so that it sits approx 5mm from the top of the antenna stud

- Needed:
- 17mm spanner
  - 19mm spanner
  - A few drill bits 2/3/5/7 mm
  - Drill

Step 3:  
Put the 19mm nut on the antenna stud and tighten it against the smaller 17mm nut

Step 4:  
Now loosen the antenna stud using the 17mm spanner and finally the antenna itself will slide out.

Step 5:

Use a small drill 2 / 3mm and carefully drill through the center. Flip it around and use a 5mm drill and gently remove excess plastic followed by a 7mm drill to achieve the same result as the other side. Be careful as not to damage the thread!

Step 6:

Clean up the thread and make sure all excess plastic is removed ready to assemble.

Step 7:

Assemble by reversing step 4 to 1
