1968-1969 Bus, Main Loom Only

1968-1969 Bus Export Model Main Wiring Harness

This main wiring harness kit fits 1968-1969 export Bus models. If your Bus is a European model, or some electrical upgrades have been performed (such as an alternator, or additional equipment), some modifications will be required.

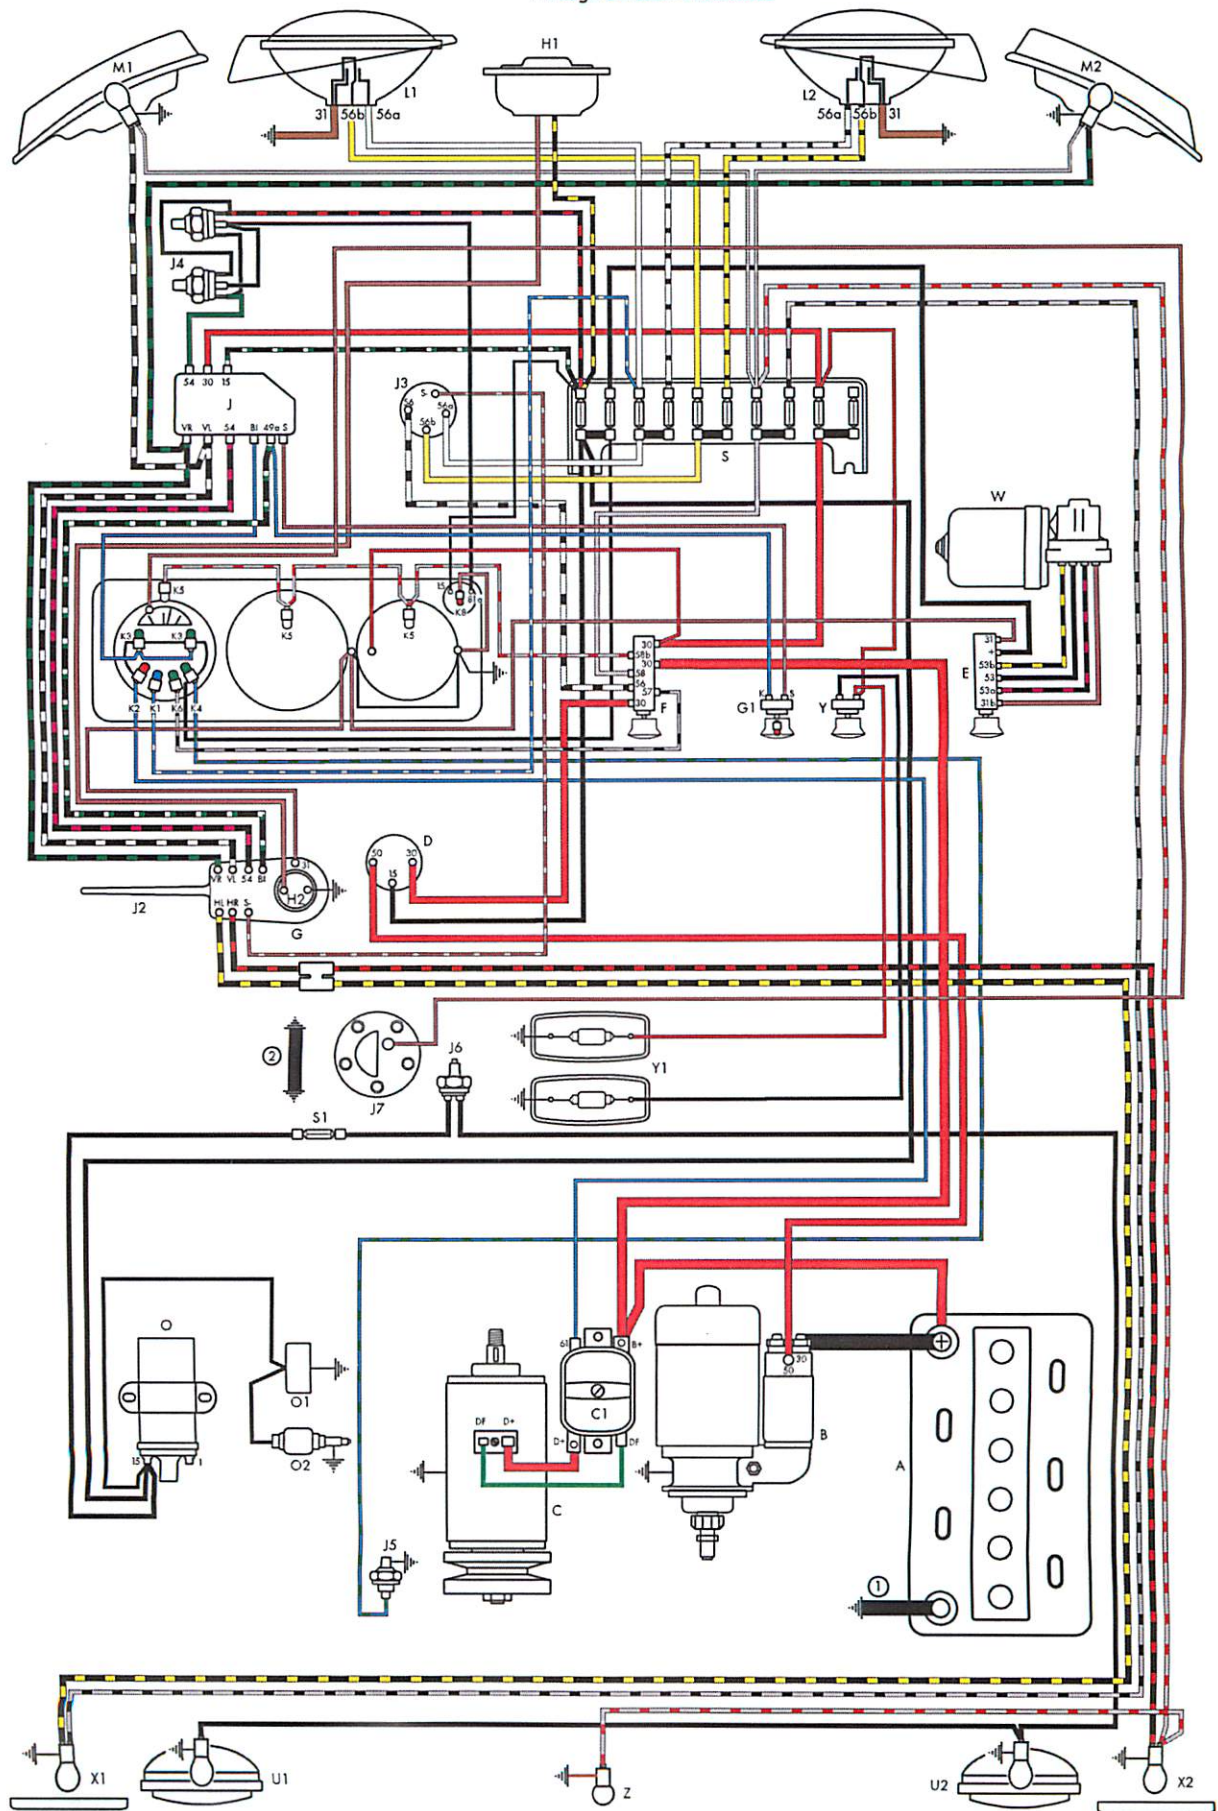

Basic automotive electronic knowledge is essential for proper installation of this wiring harness. Thoroughly read these installation instructions and study the diagrams to familiarize yourself with the basic layout of your vehicle's electrical system.

Document the routing of the old wiring harness prior to removal. A digital camera is a useful tool for this step.

Remove battery from Bus, or disconnect negative cable. Removal of the battery will allow for greater room in which to work.

Please follow the diagram on the last page for the correct position of each wire.
