

Stainless Steel Type 1 BUG Hinge Covers

Fitting instructions.

1. Apply the double sided foam pad to the back of the flat part of all the covers. (please note the foam is just to avoid any vibrations and is not essential to hold the covers on).
2. Select the correct shaped / sided cover and position over hinge after removing the backing from the foam pads.
3. Open the doors and bend the tabs down at the back of the hinge to hold totally secure.
