

UNIVERSAL WIRE HARNESS

Paruzzi # 0690

This kit includes:

1. Wire harness with covered 6 fuse box.
2. All necessary connections for early or late VW application.
3. Easy to follow color coded schematic

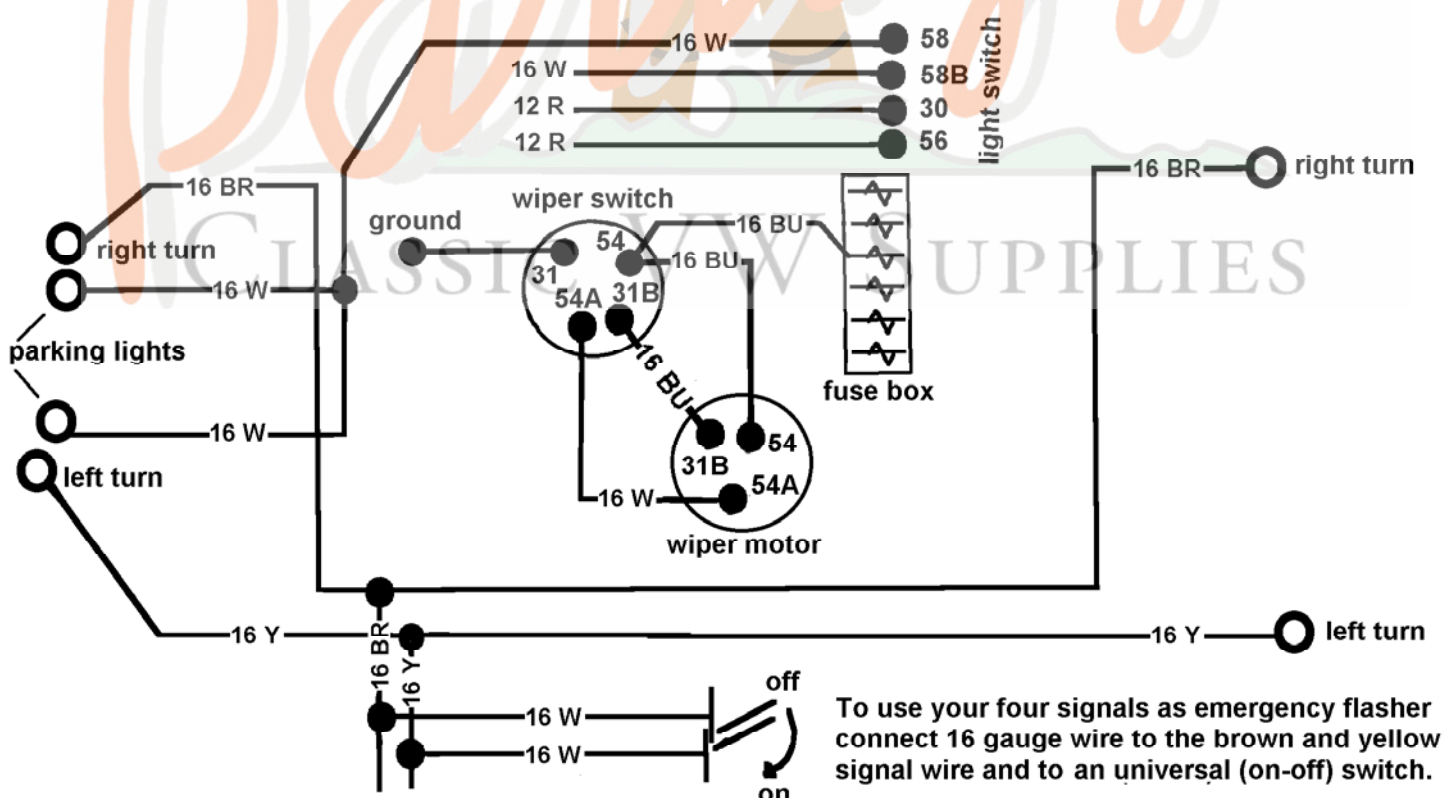

This kit contains all items necessary to give you an easy and complete kit to wire any basic buggy or kit car. Ground wires are not included in this kit, the same size wire should be used for ground as is used to feed the component. The schematic is based on a VW 1500, the numbers on the components may vary with other models but, the connections are the same.

For proper installation, lay unit on clean surface a long driver side of vehicle and locate proper wire colors and sizes. Tag them with tape and a marking pen. Check against the diagram when necessary.

Note: When ever installation, repairing or modifying any electrical system, be sure battery(s) are disconnected and all bare leads are taped.

This Paruzzi product is made in Taiwan and packed in Holland by Westerwind Nederland
