

Model years for the VW Bay Window Bus

Classic Volkswagen models have evolved over the years, with most changes being made on fixed dates. The model year precedes the calendar year: a car built in October 1970 is a 1971 model (the model change took place on August 1, 1970).

Vehicle registration documents indicate the year of first registration, which is not the exact year of manufacture. A car purchased in January 1973 may have been in the showroom for eight months, so it was built around May 1972. If you order parts, it is important to know the period of manufacture of your car so that you do not order parts that are not suitable for your classic VW.

Please note: our list of chassis numbers, also known as vehicle identification numbers (VIN), assumes that your car still has all its original technical specifications. This list is provided as an additional service and does not give rise to any rights.

Select the list that corresponds to your Volkswagen model, then look for the chassis number, which can be found on the registration documents.

If these are not available, for Volkswagen Buses, you will find the chassis number in the engine compartment.

Volkswagen Bay Window Bus model years

model year	date	chassis number	model year	date	chassis number
1968	01/08/1967	218 000 001	1977	01/08/1976	217 2000 001
	31/12/1967	218 073 585		31/12/1976	217 2081 316
	31/07/1968	218 200 000		31/07/1977	217 2300 000

	31/12/1975	216 2077 675			
	31/07/1976	216 2300 000			

Engine codes for the VW Bay Window Bus

It is important to know which engine is installed when you want to order parts. Not every 1600 Bay Window Bus has a 1600 cc engine. A lot of engines are interchangeable, often without modifications to the chassis or bodywork, so the odds are high that you have a different engine in the back of your car. Either a bigger displacement engine or an engine from another year.

If at one point the engine was replaced by a rebuilt engine, the letter combination can be different (if it has an engine number at all). Please ask the supplier for the exact year of manufacture and displacement, as they tend to use their own letter/digit combinations.

Type 1 engine code

From the engine number you can determine what type of engine it is and the displacement of the engine.

The first letter(s) determine the displacement and the type of engine. The following numbers indicate the built year.

The Bay Window Bus can have a Type 1 or a Type 4 engine installed. The location of the stamped engine code is different on both engines (refer to the pictures included in this document).

Volkswagen Type 1 engines

engine code	capacity (cc)	kW	hp	Built Years	
				from	until
1-0 020 000 => 1-0695 282	1131	18	25	1943	31/12/1953
